

Android Email Setup

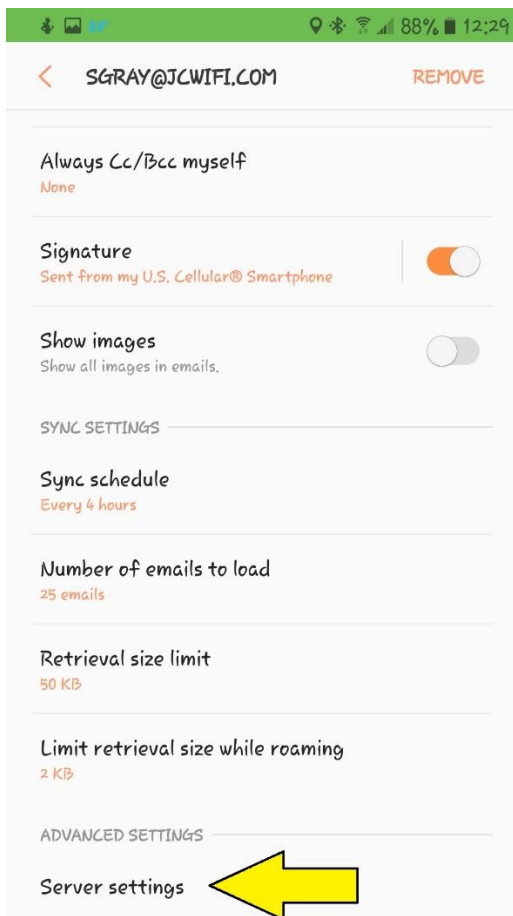

Click on the Menu.

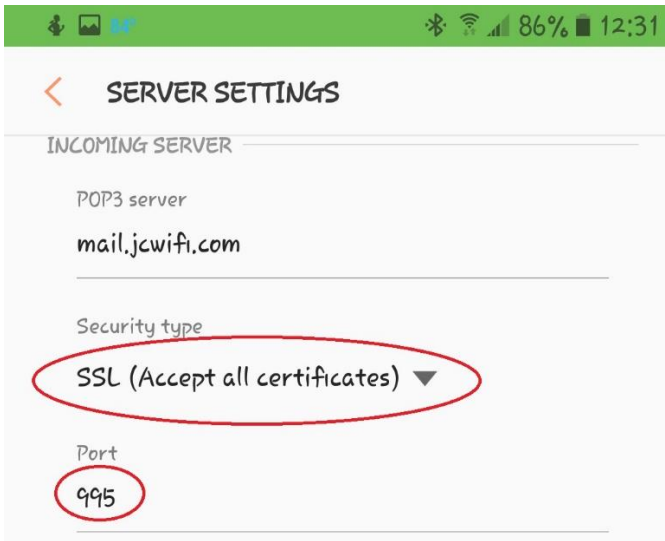

Click on Settings.

Click on your Email Account.

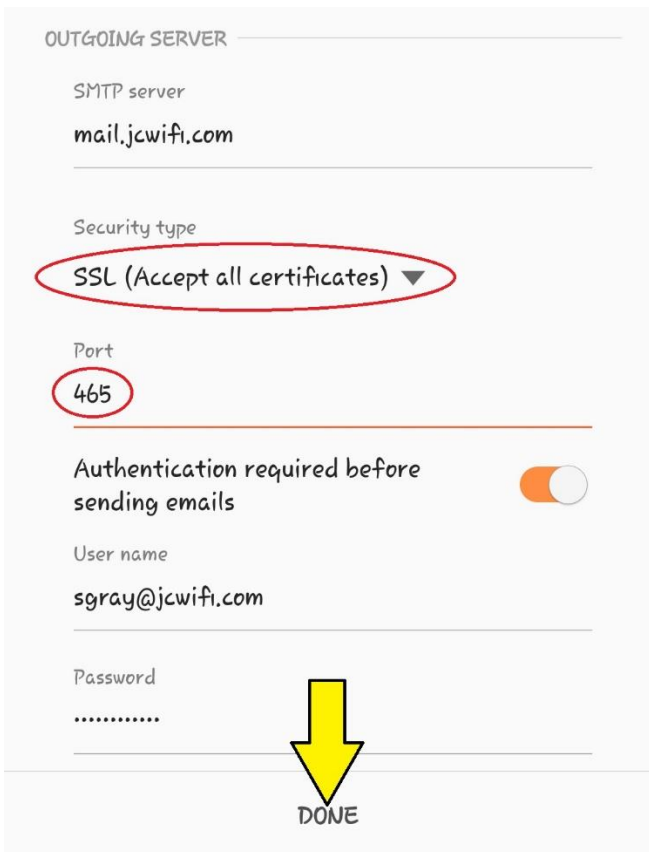

Scroll to the bottom and click on Server Settings.

Change the following settings for the Incoming Server

1. Security type: **SSL (Accept all certificates)**
2. Port: **995**

Scroll down to the outgoing settings

Change the following settings for the Outgoing Server

1. Security type: **SSL (Accept all certificates)**
2. Port: **465**. If this doesn't work, try port **587**.

After both the incoming and outgoing settings are changes click **Done**.
