# Windows Live Mail Setup

Click on "Accounts" at the top of the screen.

Click on "Properties"

Click on the Advanced tab.

Change the following settings

1. Outgoing mail (SMTP): 465. If 465 doesn't work, try 587.
2. Incoming mail (POP3): 995
3. Put checkmarks in both boxes next to "This server requires a secure connection (SSL)

Then click OK.

Internet Security Warning

The server you are connected to is using a security certificate that could not be verified.

The certificate's CN name does not match the passed value.

Do you want to continue using this server?

Yes | No

Click "Yes" to accept the certificate.
